Abstract. To find out more closely how the shipping company PT. Tirtha Dasa Lintas Nusa Belawan in handling the docking process of ships loaded with liquid bulk. In this paper, it is explained how to handle berthing of MT ships. CLARICE contains liquid bulk and the ship departure process as well as any agencies involved in the ship berthing process. From handling arrival to departure, the ship must be served efficiently and effectively so that service is maintained well. The methodology used in this paper is first the field observation method and the library approach method. In carrying out ship berthing activities, the agent must notify the ship's arrival to several related agencies such as the harbormaster's office, the PT office, (Persero) Pelindo I, Immigration Office, Customs and Excise Office, Port Authority Office, Port Health Quarantine Office.

Keywords: handling back up, boat, and dock

INTRODUCTION

With the increasing demand for liquid bulk cargo, many shipping companies are switching from cargo-laden vessels to liquid bulk-laden vessels. This is due to the fact that the time required to handle ships containing liquid bulk is shorter and the costs incurred for operations are lower. According to Soewedo (2015) sea transportation is very good as a means of transporting goods because it has more value than other means of transportation. This is because sea transportation services can be used to transport passengers, goods and animals with very large carrying capacity/capacity. Apart from that, the rates charged are also cheaper, more affordable and safer. Every ship operated by a shipping company that calls at a port, the ship requires service while at the port. The port as a terminal for ships to dock/moor and carry out loading/unloading activities needs to provide various facilities and port services managed by PT. Indonesian Port (Pelindo) and its branches at the port so that activities run smoothly and efficiently. In order to manage the activities of ships and their cargo that stop at and depart from port to port, shipping companies can open branches or appoint shipping companies as a ship agent if the shipping company does not have a branch due to economic considerations or other reasons. The duties of ship branches and agents, in this case as port agents/branch agents, are the same, namely serving the interests of ships, the only difference is the ownership status of shipping companies by other parties. The role of a ship agent is a representative of the shipping company who appoints a ship agent company called the principal, while its function

is to serve ships calling at the port. Basically, services for ship needs include: preparing mooring areas, clearing in / out, and serving the needs of the ship and its crew.

THEORETICAL FRAMEWORK

1. Definition of Handling According to the KBBI, handling is a process, method, action, cultivation.

2. Definition of berthing according to Logistics Journal D III Berthing transportation is an activity to berth or dock a ship to land/port for loading/unloading activities.

3. Definition of Ship According to Law No. 17 of 2008, a ship is a water vehicle of a certain shape and type, which moves with wind power, mechanical power, other energy, is towed or towed, including vehicles with dynamic carrying capacity, vehicles carried on the surface water, as well as floating equipment and floating buildings that do not move. According to article 309 paragraph (1) of the Commercial Code, ships are all sailing equipment, whatever their name and nature. This includes sunken ships, mud dredging machines, sand suction machines and other floating transport equipment. Even though these objects cannot move by their own power, they can be classified as "sailing tools" because they can float/float in water. According to Novaliana (2015) a tanker is a ship designed to carry liquid oil cargo in tanks.

4. Definition of Cargo According to Soewedo (2015:32) cargo is goods in the form of break bulk (goods that are not put into containers to be shipped or goods that are put into containers to be shipped. Ship's cargo is the shipper's cargo or the owner of goods in the form of unpackaged cargo (general cargo) or cargo placed in containers. According to Soewedo (2015:32), basically, sea ship cargo includes:
   a. General cargo (break bulk) is cargo that is packaged separately, not in containers.
   b. Dry bulk is dry cargo that is in natural form or has been dried like coffee beans.
   c. Liquid cargo is bulk cargo in liquid form and loaded in tanks or special packaging for liquid cargo, such as coconut oil.
   d. Grains (ore) are cargo in the form of seeds and loaded on ships in bulk, such as palm oil seeds.
   e. Cargo in container.

5. Definition of Liquid Bulk According to the national shipping management journal, the definition of liquid bulk is bulk in liquid form which is transported using special vessels called tankers.
RESEARCH METHODS

When writing a paper, of course you need materials that can support writing that can be understood and understood by readers. The methods used by the author in preparing this paper include:

1. Field Observation Method (Field Observation Method)

The method has been carried out directly by the author in the field when carrying out Land Practice (PRADA) for 6 (six) months at PT. Tirtha Dasa Lintas Nusa Belawan Branch. The methods used by the author to search for and collect data in the field include:

a. Observe and participate directly in shipping agency activities, starting from preparations before the ship arrives, the ship arrives at the port, the ship docks/moos at the pier and carries out the loading/unloading process until the ship leaves, such as checking the ship, processing ship/cargo documents and following ship docking meeting (port meeting) at the One-Stop Service Center (PPSA).

b. Conduct direct discussions through interviews

1) How is berthing of an MT ship handled? CLARICE loaded with liquid bulk so that it can dock at the dock without obstacles? Answer: Reporting PKKA (Appointment of Foreign Ship Agency) to Customs, reporting to Pelindo and then processing notification of the ship's arrival so that the ship can dock at the port.

2) What documents are required by shipping companies in handling MT ship berthing. CLARICE loaded with liquid bulk so it can dock at the dock? Answer: Port Clereance, Manifest, Crew List and Arival Condition.

2. Library Approach Method

This method is used to search for or record books in the library regarding the material discussed by the author, namely regarding handling berthing of MT ships. CLARICE at PT. Tirtha Dasa Lintas Nusa Belawan Branch.

RESULT AND DISCUSSION

History Short, Structure Organization, And Description Task Company

a. History Short Company

PT. Tirtha Dasa Lintas Nusa Belawan is company branch from PT. Tirtha Dasa Lintas Nusa in Jakarta. The formation of a company has a historical trajectory that begins with process establishment company cruise established date 11 November 2010 address on Jl. Veteran Cottage X environment 3 Belawan 1 which in lead by father Maharsine Wibisono.
PT. Tirtha Dasa Lintas Nusa Belawan provides and serve sea transport and business other move in in the field of shipping agencies, especially tankers Which load derivative oil coconut palm (palms oil product), such as: crude palm oil (CPO), refined bleached deodorized Palm Oil (RBD Palm Oil) and also processed palm oil and mixed with chemicals (oleo chemicals). Agency on PT. Tirtha Dasa Lintas Nusa Belawan serve boat charter that includes foreign companies such as: ICOF Shipping Chartering (Singapore), Pacific Intra-Link (Malaysia), Patch Kaiun Asia PTE LTD (Singapore), and foreign companies other.

Employee work in PT. Tirtha Dasa Lintas Nusa Belawan has 10 employees. Employees here it is which will do all activity in office and in field, who have expertise and abilities in their field each.

Employee the includes:
- 1. Head Branch: 1 Person
- 2. Function Operation: 6 Person
- 3. Function Administration And Finance: 2 Person
- 4. Function Document And Payload: 1 Person

b. Structure Organization

So that the company's operational activities can run smoothly good and fluent, PT. Tirtha Dasa Lintas Nusa Belawan determine the organizational structure of the company along with the division of tasks and his authority with clear. Following structure organization PT. Tirtha Dasa Lintas Nusa Belawan.

Source PT. Tirtha Dasa Lintas Nusa Belawan
c. **Description Task**

Duties oblige someone to carry out functions and not quite enough answer which has given by leader company is in accordance with the instructions. Based on the organizational structure of PT. Tirtha Dasa Lintas Nusa Belawan writer will explain task and not quite enough answer employee, that is as following:

a) **Branch head**
1. Be responsible answer fully on company
2. Coordinate member from every field.
3. Define policy and target main companies, like get profit or profit sake company.

b) **Function Operational**
1. Management activity operational boat and load in field during boat is at in harbor (before And after boat arrive).
2. Doing work which Good to agency – agency harbor, like Harbormaster, Bea and Excise (BC), Immigration and Quarantine.
3. Prepare letter – letter permission from party agency related to process backup and departure boat.

c) **Function Administration and Finance**
1. Controlling go out entry finance company (cash flow).
2. Doing payment bill company.
3. Billing costs harbor and operational to principal.

d) **Function Documents and Loading**
1. Report to the Owner / General Agent regarding ship activities starting from the ship berthing process, activity demolish load and activity departure boat.
2. Complete documents – documents which is required for unload or load, such as bill of lading (B/L) documents, delivery order (D/O), Mate's receipt (M/R), manifest and others.
3. Deliver information to shipper and consignee through telephone for inform development about backup boat and payload.

Company Cruise PT. Tirtha Dasa Lintas Nusa Belawan is one of branch Company PT. Tirtha Dasa Lintas Nusa which there is in Jakarta (General Agent). Company Cruise PT. Tirtha Dasa Lintas Nusa move in the field service cruise specifically in field export import, which the transportation use boat from scale small nor scale big.
Activities carried out by PT. Tirtha Dasa Lintas Nusa Belawan is as following:

1. PT. Tirtha Dasa Lintas Nusa Belawan collaborates with General Agent, Owner and Shipper in carrying out work which order by General Agent and Owner.
2. PT. Tirtha Dasa Lintas Nusa Belawan also serves ships - boat foreign and boat local, with activity export – import goods.
3. PT. Tirtha Dasa Lintas Nusa Belawan takes care of the needs when the ship arrives and the ship departs. Manage all permits and equipment document which required.
4. Serve process arrival and departure boat, like look after place berth, guide, cancel and other other.
5. Take care of all activities, needs of the ship and ship crew, such as charging material burn, extension document boat, and management passport or book sailor on crew.

Handling Backup Boat MT. CLARICE Loaded Bulk Liquid On PT. Tirtha Dasa Lintas Nusa Belawan

a. Function and Role Harbor

The port is the arrival and departure terminal ships, it is necessary to provide various facilities and services so that the transfer of cargo from ships to land transportation can take place smoothly, safe and efficient. In connection displacement load the there is activity provision place mooring, like dock and service service scouting (guide along with completeness it works delay and kepil).

Furthermore there is activity demolish load from and to boat which done through pipe integrated relate with tank pile it up which is at in region harbor (shore tanks). Other ship needs that need to be served while they are there in harbor is service water clean, material burn, material- food material and logistics boat.

Port as gateway for ships stopping by and leave along with the load must follow legislation invitation and regulation which applies from something area. By therefore every ship that comes/enters and leaves the port must get inspection from agencies government which is in harbor, called clearance in/out. Management activity the in on is activities/businesses from agency boat where harbor can said is land activity agency boat.
b. Activity – Activity Company Sailing
   
a) Preparation or Management Matter Which Relate with Arrival Boat

   1. Appointment Agency Boat Foreign (PKKA)

   Before arrival boat, PT. Tirtha Dasa Lintas Nusa Belawan as agency general report plan
   arrival boat to Directorate General Relations Sea with data as follows: Name of ship / voyage
   , flag / call sign, size (dwt / gt / hp), owner / principal, port stop by, estimate time arrival (ETA),
   harbor origin (last ports) and harbor objective (next ports).

   With attach agency agreement / letters of appointments, crew lists, with copy Director
   General Immigration, Authority Harbor and furthermore answer the letter is Announcement
   Arrival Boat Foreign Which given to office center PT. Tirtha Dasa Cross Nusa Branch Belawan
   with copy Head PT. (Persero) Pelindo Which concerned For PT. Tirtha Dasa Lintas Nusa
   Belawan.

1. Problem Which Faced In Process Backup Ship

The company carries out an activity that has a specific objective in the hope of obtaining efficient, effective and satisfactory results. However, this implementation will not always get the expected results. At PT. Tirtha Dasa Lintas Nusa Belawan itself, especially the agency in serving the arrival and departure of ships as well as all the interests or needs of the ship and its crew at the port, often faces several problems which will greatly influence the running of an agency's activities.
The problems faced by PT. Tirtha Dasa Lintas Nusa Belawan, including:
1. Belawan Port is unable to accommodate large tankers due to the shallowness of the port channel.
2. Limited number of fenders and bolders on the dock.
3. The Inaport system often has errors.
4. Export service note payments often have errors resulting in delayed departure of the ship.

CONCLUSION AND RECOMMENDATION

Conclusion
After writing this paper, the author came to a conclusion, namely, handling berthing of MT ships. CLARICE containing liquid bulk is a mechanism from the moment the ship arrives until it departs, requiring handling from the Agent, Harbor Master, Pelindo and Customs and Excise to the Quarantine so that the ship can dock at the pier and carry out loading, until the ship departs again.

Suggestion
After conducting observations at PT. Tirtha Dasa Lintas Nusa Belawan, the author feels it is necessary to convey several suggestions for handling MT. CLARICE Among others:
1. Before the ship arrives at the docking area, the dock should be prepared.
2. If the Inaport system is handling ship berthing errors, it is best to use a manual system so that the ship can berth at Belawan port.
